

# Where can you use Insta Protex™?

Insta Protex is so safe and effective, it can be used almost anywhere to kill bacteria, fungus, and viruses with long-lasting protection. Simply spray the solution on hard or soft surfaces and allow it to dry. For surfaces that can't be sprayed directly with a water-based product (electronics such as mobile phones & laptops), spray the solution on a clean cloth first and then use that damp cloth to wipe down and protect those more sensitive surfaces.

## AROUND THE HOME:

- Home furnishings (sofas, tables, beds)
- Bathrooms (doorknobs, toilets, showers & tubs)
- Kitchens (counters, appliances, sinks, cabinet handles)
- Remote controls
- Children's toys
- Pet beds & pet toys
- Garbage receptacles
- Air filters for your HVAC system

## PERSONAL:

- Face masks & clothing
- Your hands
- Mobile phones & other mobile devices
- Automobiles (seats, steering wheel, handles)
- Bags & purses

## WORKPLACE:

- Offices (desks, phones, chairs)
- Restrooms
- Eating areas
- Keyboards & printers
- Light switches

## COMMERCIAL:

- Shopping carts
- Restaurant tables/chairs
- Door handles
- Gasoline pump handles
- Public restrooms
- Touchscreens

**NOTE:** Insta Protex is a water-based solution. It is not intended to be sprayed directly on electronic devices. Please use caution when applying to anything that is electronic or sensitive to water.

150 Research Drive, Hampton, VA 23666
